Gripper calibration pieces (click_to_move CALIBRATE ARMS)

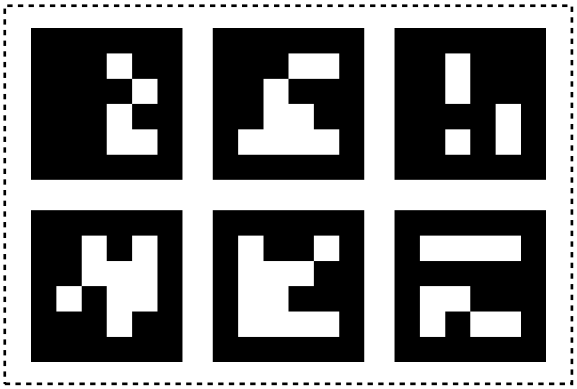

Four 75 x 50 mm pieces. Print at 100 % / "Actual size" (no fit-to-page). Check: the bar below must measure exactly 100 mm.
Cut along the dashed lines, keeping the white border. Glue each piece flat onto stiff board (2-3 mm), no bubbles or curl.
Two pieces per gripper: one on the BACK of the rail (the side facing the wrist) LEFT of the motor, one RIGHT of it,
printed side towards the wrist, flat on the rail. Which piece goes on which side, and which way up, does not matter --
but LEFT pieces on the LEFT gripper, RIGHT pieces on the RIGHT one. They must not move during the run.
Only needed for the one-time calibration: take them off afterwards (put them back the same way to recalibrate).

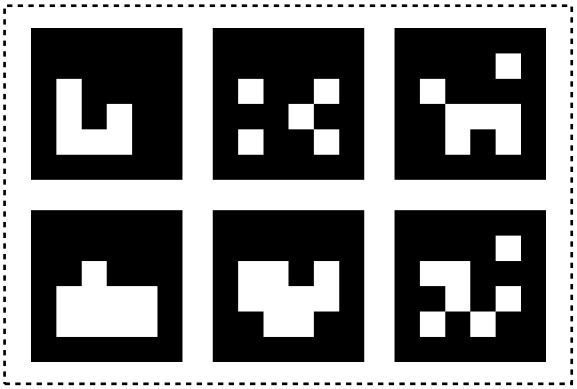

LEFT gripper, piece 1

LEFT gripper, piece 2

RIGHT gripper, piece 1

RIGHT gripper, piece 2
